The Week.—Raws: Advanced .075c. Refined: Advanced .10c. Net cash quotations this date are: Molasses, 3.125c.; Muscovado, 3.375c.; Centrifugals, 3.875c.; Granulated, 4.75c. Receipts, 21,443 tons. Meltings, 48,000 tons. Total stock in four ports, 204,333 tons, against 320,890 tons last week, and 200,921 tons last year. Beet sugar quotations, f. o. b. Hamburg, 9s. 1 1/2d. per cwt. for 88% analysis, without bounty, equal to 3.91c. for 96% test Centrifugals at New York. First Marks German Granulated f. o. b. Hamburg 11s. 2 1/2d., without bounty, equal to 4.51c. New York, duty paid.

Estimated afloats to the United States from Cuba and West Indies, 35,000 tons; Hawaii, 60,000 tons; Java, 55,000 tons; Europe, 7,000 tons; Peru, 5c., 10,000 tons. Total, 167,000 tons, against 317,000 tons last year.

Net Cash Prices Refined.—It is generally understood that the lowest price named for refined here is basis of Granulated, in barrels and bags, 4.75c. net cash, by all refiners.

Statistics by Special Cable.—Cuba.—The six principal ports: Receipts, 2,000 tons; exports, 20,500 tons; stock, 116,000 tons, against 251,000 tons last year, 5 cents grinding against 4 last year.

This week's summary of the statistical position shows stocks in the United States and Cuba together of 420,333 tons, against 455,890 tons last week and 461,911 tons last year, a decrease of 41,578 tons last year.

Europe.—Stock in Europe, 1,741,000 tons, against 1,080,000 tons last year. Hamburg reports shipment of 5,500 tons raw sugar to the United States this week.

Visible Supply.—Total stock of Europe and America, 2,161,333 tons, against 1,541,911 tons last year at the same uneven dates. The increase of stock is 619,422 tons, against an increase of 680,127 tons last week. Total stocks and afloats together, show a visible supply of 2,351,333 tons, against 1,881,911 tons last year, or an increase of 469,422 tons.

Raws.—As we anticipated, the upward movement in the market continued, with large sales at 3 1/2c. landed for 96% test and 2 1/2c. c. and f. for 95% test Cubas, showing an advance of 1-16c. for the week. All the sugars obtainable on these terms were accepted, including Porto Ricos, Cubas, Demararas, San Domingos, Javas and Beet, the total recent transactions covering some 50,000 tons.

The apparent ease with which the advance was established encouraged holders to demand still higher prices, but buyers are resisting further advances and they can afford to do so for the present, as they have well fortified their position. A little later on, however, if the demand for refined keeps up, as is likely, the necessities of refiners may be such as to warrant a continuation of the upward trend until new sugars begin to come to market. Any serious injury to the new crops would give such a movement greater impetus.

Mr. F. O. Licht cables that the beet crop in Germany is making favorable progress, but, our cable from London today reports the crop suffering from drought in some parts of Europe.

The world's visible supply is being constantly reduced to an important extent, the figures today showing only 469,422 tons increase over those of a year ago.

European markets this week advanced steadily from 8s. 3 1/2d. to 9s. 2 1/2d. for prompt beet, reacting at the close to 9s. 1 1/2d. After quite important sales of beet for shipment to American refiners at 9s. 3d. to 9s. 3 1/2d. c. and f., equal to 3.87c. and 3.88c. for Centrifugals at New York, sellers views advanced to 9s. 9d. c. and f., which checked business. It is believed that the refiners secured 100,000 tons of beet sugars during the last four or five weeks, including those intended for New Orleans.

It transpires that a moderate business was recently done in Javas for August-September shipment, the price being, it is understood, around 9s. 10 1/2d. c. and f., equal to 3.88c. landed for 96% test; sellers are now asking for the same shipment, 10s. 3d. c. and f., equal to 3.96c. landed.

Our special cable from Java on 6th instant gives exports during July of only 38,000 tons by steamer to Europe and east coast America. During May, June and July only 55,000 tons were shipped to Europe and America, against 265,426 tons same time last year. Thus far, shipments to San Francisco have been 15,900 tons and to Vancouver 17,000 tons, against none last year, and shipments to eastern countries have amounted to 102,000 tons, against 68,996 tons for corresponding time last year. Thus far the total exports are 190,000 tons, against 331,422 tons last year. It will be seen that, because of the Java crop being smaller and later than usual, and of the larger exports to eastern countries, the shipments this way have decreased 200,000 tons, at least one-half of this quantity being counted on for supplies here, and making it necessary for the American refiners to bring beet sugars from Europe to make up the deficiency. Shipments to the United States during August are expected to amount 45-50,000 tons, and all will be wanted. The present crop is estimated at 43,000 tons less than last year's production, while the exports to end of July show a decrease of 140,000 tons, indicating that shipments during the later months will be larger than usual.

Refined.—Following the improvement in raws the Howell and Federal promptly marked up their lists 10 points, to basis of 4.80c. less 1 per cent. cash for Granulated, and a day or two later the American and Arbuckle advanced their prices to the same basis. Opportunity was given buyers to engage further supplies under the usual 30 days' contracts, at the former basis of 4.70c., and this was taken advantage of generally. All the refiners are now firmly maintaining list prices. The trade being well supplied, there are, naturally, but few new orders coming in at the advance. There is some sugar in second hands, contracted for in excess of requirements, which is offering on the basis of 4.70c. Withdrawals are large, causing continued delays in shipments, especially

of small packages and of assorted carloads.

The undertone is strong at the close, and buyers would do well to keep fully supplied and to anticipate wants.

A decline of 20 points has taken place in Crockett, California, refined sugars, due to disturbed local conditions.

Coffee.—Sharp fluctuations have been the feature in the speculative coffee markets the past week. Different shades of opinion on ValORIZATION have played their part and there have been new buying and covering and realizing, with some short sales, this last chiefly for European account.

Based upon the most authentic reports of the progress of the bill, the predictions given in this column from week to week are verified by the bill becoming an actual law, which becomes effective at once. It is astonishing that this fact is still received with skepticism, because no doubt should exist of the determination of the coffee states in Brazil to operate the law, backed as it is by the necessary loans to ensure safe commercial transactions. The ValORIZATION Law is intended as a form of Government financial assistance to the planters all through the interior, in moving a portion of their crops when they have the greatest need to realize, a perfectly sound proposition and a commendable system of reform compared with the ruinous methods that have forced so many of the planters to sacrifice their product hitherto. The early operations of the Government plans will soon bring convincing results of the practicability of the same, and ValORIZATION may yet make and sustain prices for the crop.

It is difficult to conceive that any valid objection can be raised to Government action in Brazil to protect its principal industry when all other countries have found the necessity for similar policy in one form or another.

The coffee markets have been most unduly depressed for many months. ValORIZATION has occasioned some new animation and in due time can be relied upon to have its own influence, meanwhile it is advisable to consider coffee on its own intrinsic merits, justly entitled to a much better level of values—production is not equal to consumption, necessities of the trade are very acute and prospects for future crops a feature of great importance. It is undeniable that on the present scale of consumption of coffee the world requires every bag of the current crops.

European port stocks are the smallest in several years, and the interior of Europe has never been so bare of supplies. Outside of New York (New York stocks have decreased one million bags in seven months), stocks in this country are meager. A large buying and consuming capacity exists. The world must go to Brazil for supplies, and Brazil can be safely said to be in a position to dictate prices for her crops. On these facts alone the future for the article is exceedingly good and sufficient to stifle pessimism as to the paternal action of Brazil in trying to safeguard the interests of her planters.

Local quotations have been up to 8-7c. for Rio No. 7, but at the moment the price is 8-4c. nominal. Prices paid for other grades naturally vary according to the selections, but at any rate coffee changes hands in this market below what it can be replaced at in Brazil.

August options, week ending August 2: Highest, 7.15 to 7.20; lowest, 6.85 to 6.90; 7.05 to 7.10, against last year closing 6.95 to 7. No. 7 last year, 8-5c.

Visible supply of world, in bags—August 1, 1906, 9,948,053; July 1, 1906, 9,636,563; August 1, 1905, 11,465,641.

Stock U. S., all kinds, in bags—August 1, 1906, 3,443,594; July 1, 1906, 3,675,698; August 1, 1905, 4,040,757.

Stock Brazil in New York, August 8, 2,355,015 bags. Total Brazil in the United States, 2,954,683 bags. Total in U. S., other kinds, August 1, 435,065 bags. Deliveries of Brazils for the week ending August 4, 104,317 bags, against 82,468 bags last year. Receipts of Brazils for week ending August 8, 46,270 bags.

MR. PATTERSON'S CHANCES FEW

Editor Advertiser: Nine-tenths of the readers of the Advertiser will endorse your remarks on "The Case of Patterson" in this morning's issue, and the duty of the government toward him, but governments are ungrateful at best—and Mr. Patterson will seek a long time before he will be offered a job under "this" government, even though the giving would round out "a square deal."

I fear Mr. Patterson will have to look elsewhere for proper recognition of his services and would commend his case to the attention of the good people resident in Nuuanu Valley who are spared the consequences of a construction which, by the government's own action on Expert Kellogg's report, stands condemned—due solely to the vigilance and sense of duty of Mr. Patterson.

Men of his character and firmness under trying conditions are not of the kind to gracefully receive charity, otherwise my suggestion would be to raise a purse among valley residents to be handed him in recognition of his public service. There are residents of the valley who could assist Mr. Patterson to employment in lines where services of the kind he can give are in demand, and this would undoubtedly be the more acceptable course of action.

Let justice be done, that others may take heart, and give us all
A SQUARE DEAL.

Members of the San Francisco California Club have decided to rebuild their club building as soon as possible. Important new discoveries of ore bodies have been reported from Tono-

PUBLIC INSPECTION ARCHIVES BUILDING

From nine to four o'clock today the Archives building in the Capitol grounds will be open to public inspection. Yesterday morning the last payment to the contractor, the American-Hawaiian Engineering and Construction Co., was made and the keys were accepted by Superintendent of Public Works Holloway. He in turn wrote to Secretary Atkinson, chairman of the Board of Archives, transferring the building to that body.

Secretary Lydecker of the Board will on Monday begin placing the archives in their handsome depository. He will first remove the legislative and old foreign office documents from the Capitol attic to the Archives building.

A Chicago doctor is gathering microbes from the street cars to prove that the traction companies are maintaining dirty cars.

"De Maltis Nil Nisi Bonum"

The translation of the above Latin means, "Concerning malt products speak nothing but good," or in other words, "All ale is good." Admitting the truth of all this we would here remark that

PRIMO LAGER

is not only good, but better than any other beer on the local market. Its flavor, purity and reliability have won for it golden opinions wherever it has been drunk and the beer-drinking world swears by PRIMO.

If you are unacquainted with its merits order a case at once and get next to the best thing in the drinking line on earth.

Furniture at Your Own Price

The old established furniture house of J. HOPP & CO., the store in the Young Building, which recently bought the stock of furniture which belonged to the Porter Furniture Co. which is retiring from business, will place on sale at J. HOPP & CO.'S stores this morning, the entire stock of Porter's at prices which have never been placed on furniture here before.

J. HOPP & CO. carry on their own account a large stock of furniture and they have no room for Porter's stock, so they will almost give away the latter. Bring your money with you and the price will be less than you expect to pay.

Closing Out the Stock

The Porter Furniture Co. had a stock which included some high grade goods. We will "murder" these. We have a new lot of new furniture due to arrive here and must put Porter's stock out of the way.

PORTER'S STOCK AT YOUR FIGURES.

REMEMBER THE PLACE!

J. Hopp & Co.

1053-1059-1065 Young Building, Bishop Street.

Announcement

To the many friends of the HOBSON DRUG COMPANY and to our own friends and customers we take pleasure in announcing that we have purchased the entire business of the HOBSON DRUG CO. and shall, in the near future, amalgamate it with our own. The high standard, of service and goods, that has built up the reputation of both firms will be continued.

The reputation, for Purity, Cleanliness and Quality, secured for

Hobson's Soda Water

will be maintained. We have secured the services of the expert dispenser, so long with the house, and hope to merit the well-deserved patronage that this branch of the business has had.
